# 24-Port Cat.6$_A$ Keystone Patch Panel - Unshielded

769225

The equip® Patch Panel is a 19" 1U network distribution unit integrating cable management system for better routing and strain relief requirements. The staggered arrangement is designed to reduce the interference and to eliminate alien crosstalk. Featuring 24 ports, this patch panel is recommended to connect with equip® Cat.6$_A$ unshielded keystone jacks and cables to achieve outstanding 10G Ethernet performance. Moreover, each port is marked with port number for easy recognition.
