equip 19" Flat Pack Cabinet

This wall-mounted cabinet represents the conception of „flat pack", which means a demountable cabinet that is supplied disassembled.

901006

Overview

This 19" wall-mounted cabinet with IP 30 protection offers a high quality processing and the newest technologies to ensure a long operating life time. This cabinet is supplied only with a glass door and a lock. The hinge system enables almost 180° wide opening of the door. The door can be easily removed and mounted for a change of the door opening direction. The vertical 19" rails (1x pair) can be adjusted freely in any depth of the cabinet. This simplifies the mounting of the devices and the configuration of connecting cables.

Flat-Pack Concept

Reduce costs of transportation and storage. Together with a unique construction, it contributes to the attractive price while keeping all functional characteristics.
Monting

Thanks to the unique construction, the assembly procedure of equip 19" flat pack cabinet takes only few minutes and it does not almost require any tools (Torx T25).

Breakout-type Blanking Panels

The cable openings are covered with breakout-type blanking panels are ready in the top, bottom and rear part of the cabinet.
